

# Nair®

## Nair Shower Power®

### DIRECTIONS

#### APPLY CREAM

Skin must be dry before application. Dispense cream onto green side of the dry sponge and apply evenly. Repeat until the entire area where hair to be removed is covered. Make sure unwanted hair is completely covered with cream. **DO NOT RUB IN.** Hang sponge on hook in the tub/shower or place with the white side of the sponge down near tub/shower. **Wait at least 1 minute before showering.**

#### SHOWER

Step into the shower and follow your usual routine. The cream will resist wash off but a small amount of wash off is not unusual. **For optimum product performance, keep skin where cream has been applied away from direct stream of water. Make sure the cream stays on your skin for at least an additional 2 minutes while in the shower.**

DO NOT EXCEED 10 MINUTES of total application time.

## REMOVE/RINSE

Total hair removal depends on hair thickness. Rinse the sponge and use the white side to remove the cream together with the hair in a small area. If the hair comes off easily, remove the rest of the cream by massaging in a circular motion. If the hair does not come off, leave the cream on longer without exceeding 10 minutes of total application time. Once the cream and hair have been removed, rinse your skin thoroughly under the shower. DO NOT RUB. Pat dry gently.

### Safety Directions and Warnings

Irritation or allergic reaction may occur with some people, even after prior use without adverse effect. Therefore, test before each use by applying product to a small part of the area where hair is to be removed. Follow directions and wait 24 hours. If skin appears normal, proceed with full application. **Do not use** on irritated, sunburned, inflamed, or broken skin. If irritation occurs during use, remove the product and rinse area with cold water. If irritation persists, consult your physician. Product can be used on arms, underarms, legs and bikini area. **Do not use** on face, around eyes, in nose, in ears, on breast nipples, perianal or vaginal/genital areas. Product may cause surfaces to become slippery. Avoid product contact with other personal/bath items. Clean immediately in case of accidental contact with the cream. Contains Thioglycolate. Contains alkali. Follow the instructions. Always avoid contact with eyes. Should product touch the eyes, wash thoroughly with lukewarm water.
